

## Supervisor meetings:

**20/11/2024 15:30-16:30**

- Familiarised supervisor with my final project schedule/ kanban board
- Described my project vision in more detail
- Barriers to progression: time limit from other modules
- Tasks for next session: research and find sources for literature review, finalise/ update kanban board, search for data/datasets to use for project, start literature review draft

**28/11/2024 12:30-13:00**

- Updated supervisor on research progress (almost finished - technological issues left to do)
- Kanban updated and made public
- Barriers to progression: external factors, time consuming research, quality data is hard to find
- Tasks for next session: finish research, find data/ datasets to use for project, work on literature review

**05/11/2024 12:30-13:30**

- Changed Kanban platform from Asana to Moodle, due to hidden required subscription
- Found more promising data from a financial lending company in the US the prototype could use
- Compiled a short word document on ideas of what type of sources I could use for my project
- Started and progressed with Literature Review
- Working on bibliography and referencing in completed sections
- Tasks for next session: continue literature review, find more data

**12/12/2024 12:30-13:30**

- Changed Literature Review per feedback as it was too summarised and not detailed enough – more of an introduction
- Made more progress on Literature Review and Introduction
- Continued refining the bibliography/ referencing section
- Barriers to progression had to restart my literature review draft from scratch as I was not satisfied with it
- Tasks for next session: complete literature review, start cleaning up data to use in credit check/ reliability simulation assessment, start and complete technological review

**19/12/2024 12:30-13:30**

- **Absent due to external weather factors**
- Will continue to work on my current tasks: start writing the methodology section, finish literature review

**09/01/2025**

- **No meeting**
- Will continue to work on my current tasks: finish and polish introduction, literature review, technological review, methodology, create a credit eligibility assessment algorithm/ program using dataset found.

**16/01/2025 -**

**23/01/2025 -**

**30/01/2025 -**
